

Space Guard Types

- **Plastic Space Guard:** Light weight, plastic, ambidextrous and easy to install, this space guard is designed to be installed on 36" or 32" wide residential elevator hoistway doors and fill a 2½" space. It comes standard in white but can be painted in the field.
- **Wood Space Guard:** Custom made at full height or half height, accommodate existing door handles, locks and windows. They are also available in several hardwood veneers, which can be stained and or clear coated or painted to match the home.
- **Expandable Wood Space Guard:** To fill a space greater than 3¾", the full height, articulated, wood space guards are expandable to fill up to an 8" void, from the face of the door to the landing sill edge, and retract to the face of the door when the door is open.
